Work Experience

Juspay (Xyne-Spaces *World's first Open-Source OrgOs*) – Product Engineer I **Bangalore** *Jun 2025 – Present*

- Engineered an event-driven workflow orchestration platform for designing, executing, and monitoring DAG-based multi-step pipelines with AI agent integration, WebSocket-backed real-time collaboration, and state-machine-driven execution, reducing pipeline execution time by 60%+ through integrations with Jira, Bitbucket, Jenkins, Google Meet, and external applications.
- Integrated a Docker-based service, **Context Aware Config (CAC)**, enabling configuration-level migration of multiple SLAs.
- Worked across the full stack using **TypeScript** – Express.js/PostgreSQL backend with Prisma, and a React 19/Vite dashboard with **Zero Sync-Engine**, visual workflow builder, and org/project hierarchy (Context Aware Config (CAC), TanStack Query).
- Developed a React + TypeScript dashboard using TanStack Query for real-time data fetching and [@juspay/blend-design-system](#) for UI, styled with Tailwind CSS — delivering live workspace metrics (messages, users, calls, tickets) with auto-refresh and multi-theme support.
- Open Contributions:** Advanced the Research Agent, authored [AST parsers for multiple languages](#), implemented MCP for internal repositories, and shipped merged PRs across 10+ repositories and have 20+ Product Knowledge.
- Collaborated with **7+ cross-functional managers** to ship complex features and system integrations.

Juspay (Euler-Mandate) – Product Engineer Intern **Bangalore** *Mar 2025 – Jun 2025*

- Integrated multiple APIs including Notifications, Webhooks, and Mandate Transaction APIs; worked on diverse payment methods and TPV validation, and delivered production-grade code powering systems that process millions of daily transactions.

Skills

- Languages / curriculum:** Python, Typescript, React, Haskell, SQL, Postgress, Vector Database ,HTML5, CSS, Django, Numpy, Pandas, Matplotlib, IOT.
- Artificial Intelligence:** Machine Learning, Deep Learning, Reinforcement Learning, Computer Vision.
- Cloud & DevOps:** AWS, Docker, Kubernetes, Linux, CI/CD, Containerization, Docker Compose, Kubernetes Deployments, Services, ConfigMaps, Secrets, Ingress, Monitoring Basics, Redis.
- Developer Tools:** Git, Jenkins, Bitbucket, Postman, Kibana, Android Studio, Google Colab, VS Code, Jupyter Notebook, PyCharm, Tableau (Basics).
- Non-Technical:** Time administration, Industrious by nature, Open to acquiring new knowledge, Self-control, self-motivation, leadership and original thought, Critical reasoning, Communication, Social Skills, Flexibility.

Projects

(Reinforcement Learning, OpenAI Gym, Python, Javascript) [Autonomous Lunar Lander Agent](#) *2024*

- Crafted an autonomous lunar lander using reinforcement learning in OpenAI Gym, demonstrating proficiency in Python and complex algorithm design in an environment with (0-20)% uncertainty.
- Optimized algorithm efficiency by 20%, enhancing the precision and performance of the autonomous landing system.
- Reduced execution time by 15% through extensive time comparisons and fine-tuning of the algorithms.

(AWS Services, Real-time Tracking, Twilio) [Amazon Product Price Tracking and Alert System](#) *2023*

- Created an app using AWS services (EC2, S3, Lambda) for real-time price tracking and seamless data integration.
- Enhanced notification speed by 90% using Twilio for real-time alerts, significantly improving user responsiveness to price changes.
- Reduced response time by 70% with features like automated alerts and real-time price tracking, streamlining user experience.

Education

Bachelor of Technology - Vignan University

CGPA - 8.49 /10.0 *2021 - 2025*

- Computer Science and Engineering - Artificial Intelligence and Machine Learning

CBSE (Math Physics Chemistry) - Army Public School

Percentage - 92.6 *2006 - 2021*

Achievements & Certifications

- Codechef** - 5*-Star (2000+ Rating, 90+ Contests, Problem Setter, Global Rank: 09 in Starters 104) [Profile](#)
- Leetcode** - EX-Guardian (2100+ Rating, 700+ Problems Solved, Weekly Contest-402 AIR-15) [Profile](#)
- GATE (Data Science and Artificial Intelligence)** AIR-724, IISc Bangalore - Written out of curiosity. [Scorecard Link](#)
- AWS Certified Cloud Practitioner** [Certificate](#), **Oracle** - Professional Generative AI Certification [Certificate](#)
- Visit 2k24** Coding Problem Setter, **Best Project Award VFSTR** .
- Winner** - CodeHack Coding Contest ([Certificate](#)); Achieved 25+ double-digit contest ranks, participated in 150+ (Codechef 90+, Leetcode 30+ etc.) coding contests, and solved 2000+ problems on LeetCode and CodeChef.
